Project supervisor:
Carlos Enmark, TAWI AB Sweden
Project number: 4676
Project engineer: Mikael Kayser
Industry: Furniture industry
Lifting: Panels
Used with: Vacuum yoke with tilting function
Max capacity, this version: 80 kg

This company delivers concepts for training, conference and school facilities. The products range from basic whiteboards to complete solutions for professional presentation rooms.

For their manufacturing process, TAWI has delivered a pneumatic vacuum tool with tilting function. This application can be combined with a TH80 (or a chain hoist) for vertical motion.
